

Jeri Engstrom
Certified Crop Advisor

Jeri comes to us from Glasgow, Montana where he had worked in the farming industry his entire life. Upon graduating from Glasgow High school, Jeri married his high school sweetheart, secured his own Farmland, had three children and operated that property for thirty-two years.

For a few short years during that time, Jeri also worked for a Cattle Feed Dealer where he conducted forage tests to balance rations and grew the sales territory. He also represented a local seed company where he was tasked with everything from diagnosing crop issues to crop side-by-side comparison studies.

From 1995 to 2002 Jeri served as 4-H Leader in Glasgow. From 2003 to 2005 he also served as Valley County Beef Superintendent where he supervised the market beef portion of the fair.

In 2008, Jeri decided to further his education at the University of Illinois, where he excelled in Applied Agronomy. He obtained both his Rocky Mountain Region Certified Crop Advisor license and his Idaho Pesticide Consultant license.

With over 30 years of agricultural experience and as many years of one-on-one experience with farmers and ranchers, Jeri is a very valuable resource at Scythe and Spade.
